

AVIATION SAFETY MANAGEMENT

Dr Nadine Itani

15 January 2025

OUTLINE

- Introduction and the regulatory framework
- How is aviation safety managed and assessed?
- Challenges and opportunities

WHAT IS THE AIR TRANSPORT SYSTEM?

The air transport system refers to a complex, interconnected network of stakeholders, infrastructure, and processes that facilitate the safe, secure, efficient, and sustainable movement of passengers and cargo by air.

THE GLOBAL AVIATION INDUSTRY

- The global aviation industry connects over 67,000 routes, servicing more than 4.4 billion passengers annually (IATA, 2023).
- Aviation contributes approximately \$4.1 trillion to global GDP (approximately 3.9%) and supports nearly 86 million jobs worldwide (Air Transport Action Group, 2024).
- Middle East aviation market represents around 8% of global passenger traffic, with consistent growth projections despite recent challenges (OAG, 2024).

A COMPLEX INTERCONNECTED GLOBAL NETWORK

يساهم قطاع الطيران بشكل كبير
في نمو الإقتصاد اللبناني

The air transport sector makes a major
contribution to Lebanon's economy.

LEBANON LOCATION MAP

ICAO Strategic Objectives

KEEPING THE AVIATION GLOBAL NETWORK **SAFE** IS A KEY DRIVER TO **GROWTH**

Safety is a **license to operate** and has direct commercial implications:

- Boeing share price declined by more than 35%
- Jeju air share price dropped by 13%

WORLDWIDE SAFETY REGULATIONS ARE SET BY THE INTERNATIONAL CIVIL AVIATION ORGANISATION (ICAO)

- The Chicago Conference resulted in the Chicago Convention of December 1944, signed by 52 countries that created ICAO.
- The convention through **19 Annexes**, established the set of standards and recommended practices (SARPs) for civil aviation covering both technical and economic aspects.

Safety, security, airworthiness, infrastructure, and aircraft operations.

e.g. Annex 19; 17; 8; 6.

Market facilitation, economic regulation, and environmental considerations.

e.g. Annex 9; 16

ICAO ANNEXES

Annex 1 Personnel Licensing

Annex 2 Rules of the Air

**Annex 3 Meteorological Service for
International Air Navigation**

Annex 4 Aeronautical Charts

**Annex 5 Units of Measurement to be Used
in Air and Ground Operations**

Annex 6 Operation of Aircraft

**Annex 7 Aircraft Nationality and
Registration Marks**

Annex 8 Airworthiness of Aircraft

Annex 9 Facilitation

**Annex 10 Aeronautical
Telecommunications**

Annex 11 Air Traffic Services

Annex 12 Search and Rescue

**Annex 13 Aircraft Accident and Incident
Investigation**

Annex 14 Aerodromes

Annex 15 Aeronautical Information Services

Annex 16 Environmental Protection

**Annex 17 Security: Safeguarding
International Civil Aviation Against
Acts of Unlawful Interference**

**Annex 18 The Safe Transport of Dangerous
Goods by Air**

Annex 19 Safety Management

INTERNATIONALLY

International and regional organisations

- ICAO – International Civil Aviation Organisation
- EASA – European Aviation Safety Agency
- FAA – Federal Aviation Administration

Trade associations

- IATA – International Air Transport Association
- ACI – Airport Council International
- TIACA – The International Air Cargo Association

NATIONALLY

Every country has a national aviation authority, responsible for ensuring that:

1. The aviation industry meets the highest **safety** standards.
2. Consumers have choice, value for **money**, and are protected and treated fairly when they fly.
3. The aviation industry manages **security** risks effectively.

CAA governs and regulates **civil aviation safety**, including certifying aircraft airworthiness, licensing pilots and air traffic controllers, licensing airports and enforcing regulations.

WHAT IS AVIATION SAFETY AND HOW IT IS ASSESSED?

BASIC CONCEPTS

Safety is “the state in which risks associated with aviation activities, related to, or in direct support of the operation of aircraft, are reduced and controlled to an acceptable level”.

Safety management seeks to proactively mitigate safety risks before they result in aviation accidents and incidents.

The effectiveness of a State’s safety management activities is strengthened when implemented in a formal and institutionalized way through a **State Safety Programme (SSP)** and through **Safety Management Systems (SMSs)** for its service providers.

ICAO

International Standards
and Recommended Practices

Annex 19 to the Convention on International Civil Aviation

Safety Management

Second Edition, July 2016

This edition supersedes, on 7 November 2019, all previous editions of Annex 19.

Welcome to the USOAP Continuous Monitoring Approach (CMA) website

ICAO's Universal Safety Oversight Audit Programme (USOAP) focuses on a State's capability in providing safety oversight by assessing whether the State has implemented the critical elements (CEs) of a safety oversight system effectively and consistently. This enables the State to ensure the implementation of ICAO's safety-related Standards and Recommended Practices (SARPs) and associated procedures and guidance material. In addition, it provides ICAO with a means to monitor continuously the States' fulfilment of their safety oversight obligations.

Launched in 1999

Embedded the CMA in
2010

USOAP
Continuous Monitoring Approach

Promoting global aviation safety

by continuously monitoring and updating
the safety oversight capabilities of all ICAO Member States.

ICAO carries out audits and other monitoring activities to determine the safety oversight capabilities of its Member States by:

- Assessing their effective implementation of the 8 CEs in 8 audit areas (i.e. LEG, ORG, PEL, OPS, AIR, AIG, ANS and AGA) through Protocol Questions (PQs); and
- Verifying the status of the Member States' implementation of:
 - Safety-related ICAO Standards and Recommended Practices (SARPs);
 - Associated procedures; and
 - Guidance material.

Audit Areas

Safety Audit Results: USOAP interactive viewer

Please select a country from the list below the viewer to see its audit 'Effective Implementation' (EI) score presented for the various categories covered under ICAO's Universal Safety Oversight Audit Programme (USOAP). Multiple countries may be selected at once to compare their respective performance, and users may also compare a country or countries against the current global average in each category.

Developers may also wish to consider accessing the EI data via the [iSTARIS API Data Service](#).

Effective Implementation (%)

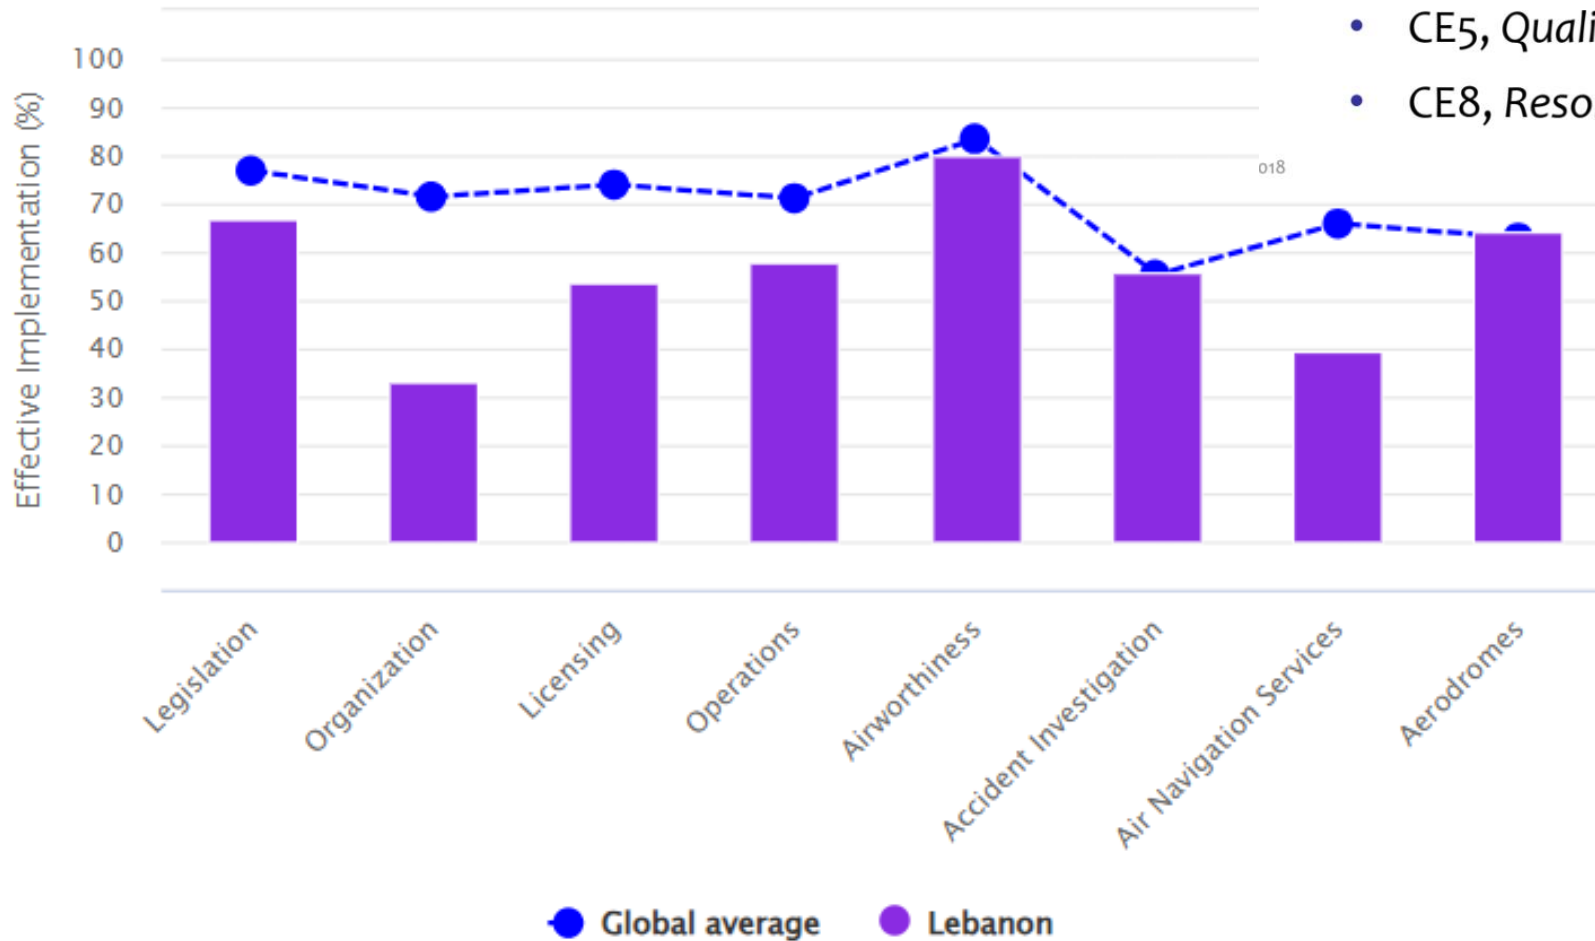

Category	Effective Implementation (%)
Legislation	70
Organization	65
Licensing	72
Operations	68
Arrangements	75
Accidents Investigation	55
Air Navigation Services	60
Aerodromes	58

Benin	2019	Compare
 Bhutan	2022	Compare
Bolivia (Plurinational State of)	2021	Compare

EI of Audit Areas – Lebanon 2017

✈ Critical Elements CEs with low EI are;

- CE4, *State Systems & Functions*, at 31.17%
- CE5, *Qualified Technical Personnel*, at 15.49%and
- CE8, *Resolution of safety issues*, at 43.75 %

Effective Implementation by Critical Elements of the Safety Oversight System

EI before Audit: 61.73%
EI after Audit: 57.44%

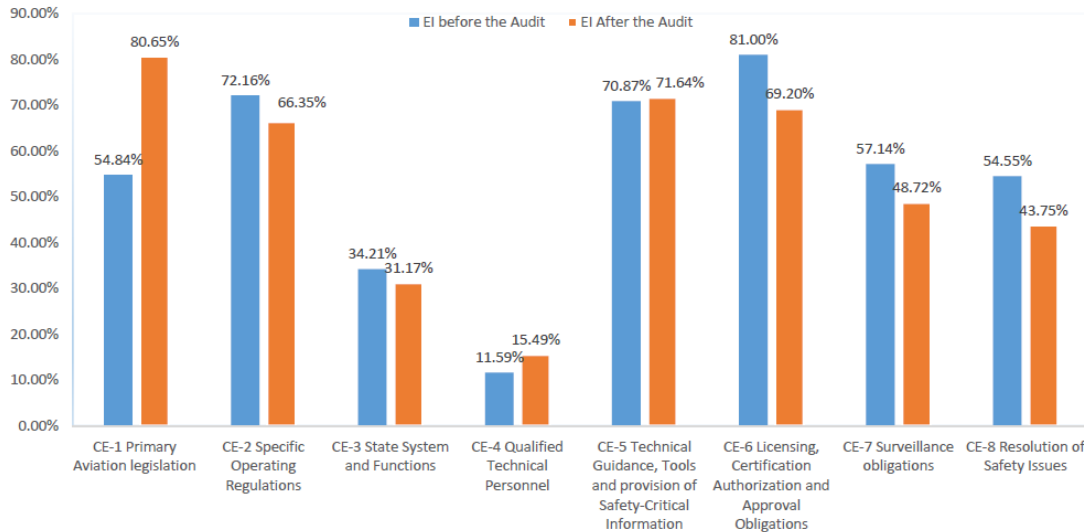

2.3 Lebanon was first audited in 2008. 4 other missions were conducted since then, the latest being in 2017. Since the initial audit, Lebanon has slightly improved its effective implementation (EI). The current overall result is **58.5%** EI.

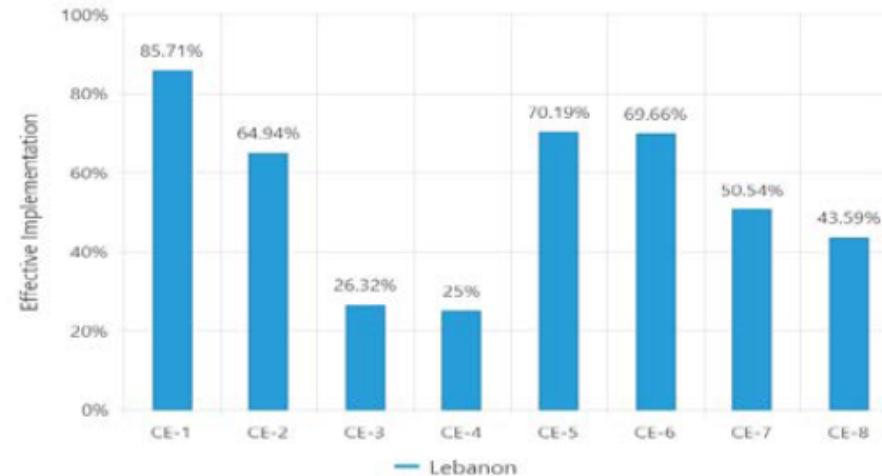

2.4 The EI of the Priority Protocol Questions (PPQs) is **57.3%**. The PPQs are a subset of PQs classified as Priority PQs, which, if found not satisfactory, may indicate a lack of capability by a State to identify and/or resolve operational safety and fundamental accident investigation deficiencies effectively.

2.5 Implementation Critical Elements (CE-6, CE-7 and CE-8) have EI of **60.7%**.

2.6 With respect, EI by Audit Area, ORG, AIG, ANS and PEL represent the lowest EI around **45%**: while for the Critical Elements CE-3 and CE-4 are the lowest with EI around **25%**, followed by

EI by CE

CHALLENGES AND OPPORTUNITIES

في لبنان خارطة الطريق لتطوير قطاع النقل الجوي
متعثرة وتصدم بـ:

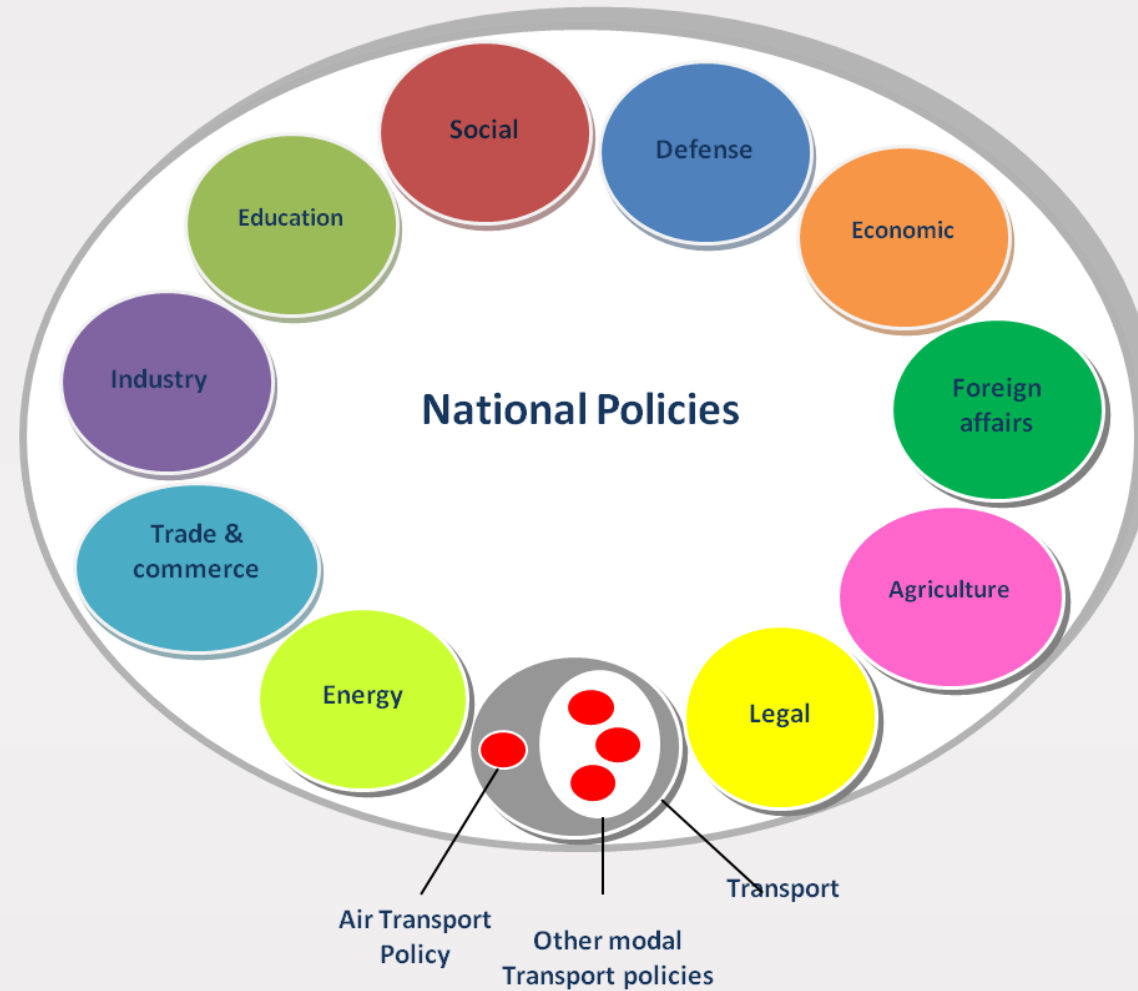

1. عقبات تشريعية (عدم نفاذ قوانين تنظيم قطاع الطيران)
2. عقبات إدارية (غياب الهيكلية الإدارية الحديثة وغياب الاستقلالية الإدارية)
3. عقبات تشغيلية (عدم الفصل بين الرقابة والتشغيل، ندرة الكوادر البشرية الكفوءة)
4. عقبات مالية (عدم الاستقلالية المالية وضعف القدرة التنافسية التسعيرية)
5. تحديات سياسية.

Most problematic factors for doing business

Source: World Economic Forum, Executive Opinion Survey

Context of National Air Transport Policy

اهمية تكامل سياسات النقل الجوي مع السياسات الوطنية التنموية
Air transport policy shall be integrated within national
policy planning process.

اهمية التخطيط المترابط للنقل الجوي

- 1 Lebanon economic vision
- 2 National transport plan
- 3 Civil aviation master plan
- 4 Airports development plan

Civil Aviation Master Plan - Lebanon

Four key goals

Institutional Reform

- Enact law 481/2002.
- Establish an autonomous and an independent Lebanese civil aviation regulatory authority.

Step 1

Safety & Security

- Effective implementation of State Safety Plan (SSP) & Oversight CMA.
- Endorse National Civil Aviation Security Program (NCASP).

Step 3

Airport Infrastructure

- Airports Development Plan (Beirut & Quleaat)
- Establish BIAC
- Mobilize public - local private - community resources.

Step 2

Air connectivity

- Implement the full liberalization of air transport regulations (Ministerial decree year 2000).
- Optimize airspace infrastructure.
- Upgrade MEA routes and promote low cost carriers' market.

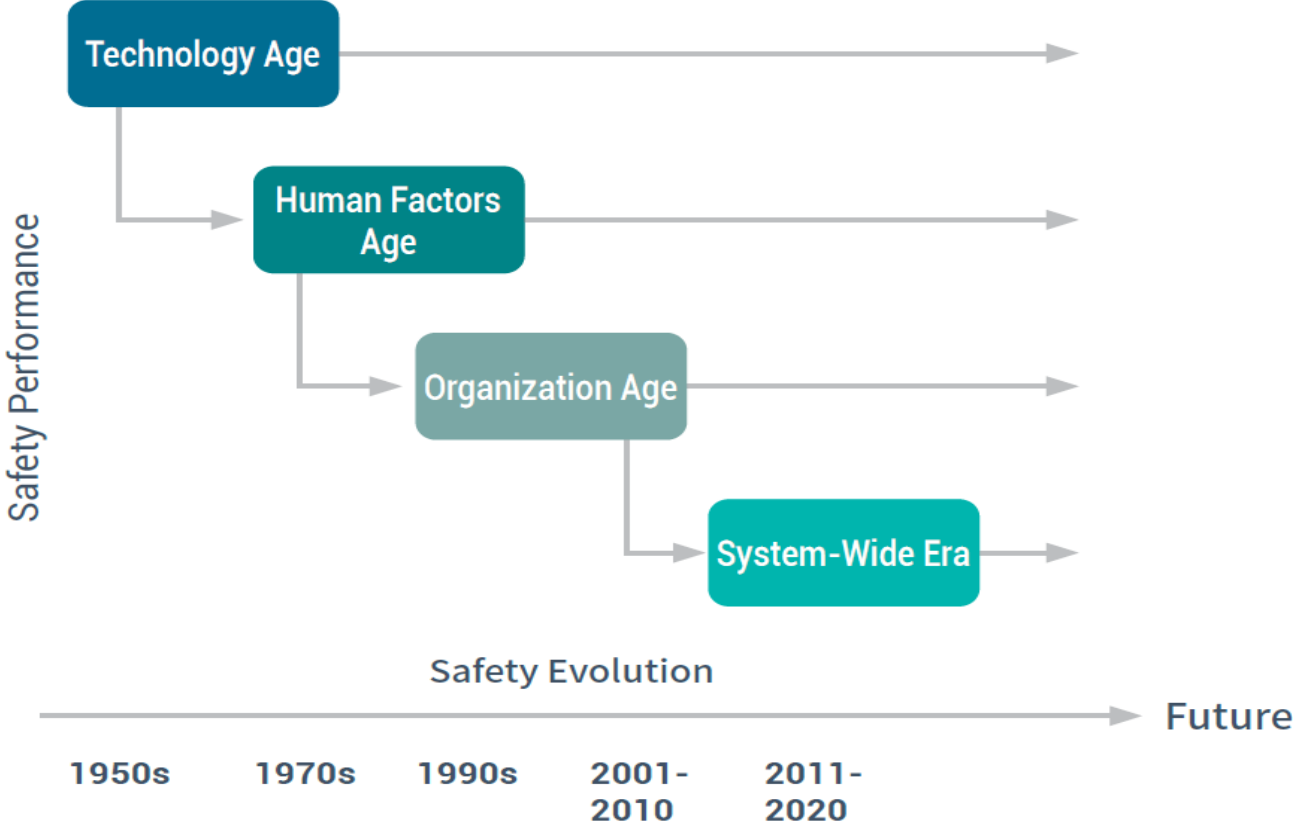

Step 4

Questions?

EVOLUTION OF AVIATION SAFETY FOCUS

SOURCE: ICAO, 2018

AIR TRANSPORT IS BY FAR THE SAFEST MODE OF TRANSPORT
